BUSINESS, MINING AND STOCKS A VANDERBILT STRIKE

Important Industry That Demands Official Recognition.

APPOINTMENT OF A COMMITTEE TO DIRECT THE CELEBRATION.

The His Sunflower Mine-A Property of Merit That Gives Good Promise For the Future-The Great Show-In the Lambert & Drake Property-The Dalton Assessment -Quite a Rush For the Stock at the Delinquent Sale-Close Shave For One of the Stockholders-Reseinded the Contract-The Salt hake & Ogden Gas & Electric Light Company Without a Fran-

At the recent meeting of the California Miners' association a resolution was adopted strongly recommending and urging the appointment of a cabinet officer to be known as the secretary of mines and mining.

This action, without doubt, will meet with the hearty approbation of every mining man, and there is every reason to believe that the endeavor to secure the appointment of such an officer in the presidential cabinet will meet with the hearty co-operation of nearly every citizen of the great west, as it goes without saying that the im-portance of the maning industry is but little recognized by the general govern-ment, and also that it is just as wer-thy of recognition as are the agricul-tural for the control of the second nterests of the country; and it high time that steps were taken ooking towards the consistence of a distinct department under the super-rision of the government for the more perfect development and advancement formakes the an inducty which farmshes the intry with the real sinews of war, it is money that we are all stric-tor, and the product of the indices country is enduring wealth.

esseity of the establishment of such an office in the cabine, says:

The desire expressed in this resolution cannot be attained without hard work. There is needed a resolution to succeed, as well as one of derive. That, in turn, must be a resolution of will as well as of form. It should be the resolve not merely of the Minors' grandation, but of all the Greater West. It should be, increaver, a firm, fixed and determined resolve. Let us make if so. At the present time the affairs of the

At the present time the affairs of the mining industry of the United States are sentered about among various sareauss of the department of the Interior. No official, not even a subordinate one, is a counsible for their advancement, or even their right management. The commissioner of public irrules supervised some part of the work, the bureau of mineralogy another, and the accordinate surface a third. Thus the industry is nowless result is confusion and, in many cases, injustice.

The necessity for a bente supervision of the industry is unade evident by the repeated memorials to congress

repeated memorials to congress om the miners stating specifically a criis from which they suffer un-rexisting conditions, and also by the Meulty they experience in obtaining the most elementary and neces-legislation to secure their rights

and advance their interests.

The magnitude of the industry is in test sufficient to justify the establishment of a s parate department in the national government for its man-agement. Mining no less than agriculcoast. In the fullest sense it is a great national industry and should have national recognition.

There is, however, something more than the extent of the industry to be considered. If he one whose successful

considered. It is one whose successful operation involves great expense. It is conducted under an infinite variety of conditions and in many instances in keen competition with the rest of the world. It is moreover, a thoroughly selective industry, and the American mine must be kept posted on all newly discovered processes if he is to accomplish the best results in his work. considered. If is one whose successful

The subject is one that calls for argument at this time. The computing of education in regard to 2 will come in due senson later on. The people of the great mining states understand almost the importance of the object almod at. The first thing to be done is to rwise in them a determination to attain it. It is to that and we direct our efforts this morning.

THE DALTON ASSESSMENT.

Oulte a Rush For the Stock at the Delinquent Sale.

The sale of delinquent Dalton stock which took place Tuesday afternoon was so well attended that the idea that all interest in this property had died out was shown to be without founda-tion, and the eagerness with which the stock was bid in by those present would indicate that in the mining world this property was still possessed of wards.

merit.

There were about 25 brokers and mining investors at the sale of Dalton stock, and the bidding was jeth ton stock, and the bolding was each active and spirited, the prices at which the stock was knocked down at being all the way from 2% to 3% cente, according to the size of the certificate. As there was only about 11,000 shares As there was only about 11,000 shares delinquent the buyers failed to make much of a haul even at these figures, which in some instances were higher than the bilding questions on the floor of the Mining Exchange. At these figures only a portion of the delinquent stock had to be sacrificed for the payment of the assessment, so that the bulgers still have sentified left in the holders still have something left to

The sale was not without its inter-esting features, one of which was the appearance of one definition struck-holder just at the time when his stock —7,500 shares—was being auctioned off. This individual rushed into the room with the assessment money in his hands and before he had shut the door hands and before he had shut the door he called out to "stop the sale." The buyers present entered a protest at this, but the law reads that the as-sessment and costs of advertising can be paid at any time before the actual sale of the stock. This was a narrow shave for the stockholder; but in this instance a minute was as good as an hour, for the stock was saved just about as it was to pass into the posabout as it was to pass into the pos-

It is the general opinion that there will be a gradual advance in Dulton stock from now on, and especially so as it is reported that the lessees of property are now taking out high

RESCINDED THE CONTRACT.

The Sult Lake and Orden G. & E. L. Company Without a Franchise. Another page in the history of the Another page in the metal dollars of the Salt Lake and Ogden Gas and Electric Light company was added yesterday when the company notified the New American Gas and

A SECRETARY OF MINES its contract with it and that hereafter the electric company would not look to the gas company for its supply of

this needful commodity.

It is well known in this city that it is the gas company that has the franchise from the city for the right to furnish consumers with gas, and that the electric company has been operating under this franchise, and no other; and the supposition would be that the rescinding of the contract as above noted would carry with it the privilege of the franchise; but it seems otherwise, as it is understood that the company expects to continue the delivery of natural gas, which supply is to be derived from the wells owned by H. L. Driver and his associates.

clates. . Some two months ago, The Herald clates.

Some two months ago, The Herald is informed, the electric company requested the gas company to that a deep well, which request has been campiled with, but while this work has been going on the gas company made arrangements with the Driver people to maintain the gas supply as the gas company could not sink a new well and at the same time keep its flowing wells from clogging up. This new well is now down to the depth of 1,200 feet, and it is stated that the gas rescreoir is just about to be impred and that even now the volume is such that a light can be obtained by holding a lighted candle over the top of the well, and it is believed that within a short time a fine flow will be enhandled by previous owners in a

has not been stated what steps the gas people will take in the matter, but it is the general opinion that it will invoke the aid of the courts to prevent the electric company from continuing business without a franchise.

ANCHOR STOCKHOLDERS MEET. Board of Birectors Elected to Serve

For the Ensuing Year. Park City, Nov. 18.-The annual

meeting of the Anchor Mining company was held this merning in the company's office in this city, 94,080 shares of the stock of the company

smares of the stock of the company being represented.

The following board of directors was elected for the easting year: Francis Smith, J. M. Adams, E. F. Holmes, F. A. Nims, S. C. Tewksbury, D. C. Mc-Laughlin, Dayid Keith, R. Mackinish and H. E. Myers. The board will meet on the second Wednesday in December to elect officers. The stockholders listened to the report of the manager, which was entirely satisfactory.

The Ontario mill made a shipment of buillon today amounting fo 38 bars, which contained 32,124,12 ounces of fine silver.

Six hundred and fifty shares of Val-lejo stock were sold Monday and

HAMILTON SMITH IN BUTTE.

Examination of the Anaeonda Mines For Ris Company. (Special to The Herald.)

Butte, Mont., Nov. 18.—Hamilton Smith, representing the Rothschilds, arrived in the city today to make a further examination of the Anaconda mines, and the report again in circulation is that his visit has to do with a proposition to purchase the remaining proposition to purchase the remaining interest in the company's mines for the English Exploration company. Mr. Smith states that he is here only to inspect the property in the interest of the foreign stockholders. From Butte he will go to Telluride, to examine some mines there for the Exploration company.

Mining Notes and Personals

The Mackintosh sampler vesteriny re-ceived 188 tons of Silver King ore. Judge Henry Rivers will go out to Mercur this morning on business con-nected with De Lamar's Golden Gate

The Marion Consolidated, near Alta, is new working a force of 12 men, but on account of the deep snow ore salpments have been discontinued for the winter. The directors of the Gold King held a meeting a day or two ago and decided to resume development on its group of claims near Manning, not far from the camp of Mercut.

camp of Mercur.

D. Edmunds et al. have located and filed for record the Edmunds group of mining claims Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9 and 18 The claims are situated in scuth fork of American Fork conyon.

Another 40-ton lot of Humbug ore was soid on the open market yesterday that assayed 16.1 per cent lead, 18.2 ounces silver and H in gold to the ton. The Germania was the highest bidder and secured the lot.

lot.

t is reported that the Hillside mine, loining the Mercur. Is showing up in a st encouraging manner, and that in a lower tunnel the top of a large body ore has been encountered that assays the way from \$1 to \$7 in gold to the

The assessment work is now being done on the group of time claims on the western slope, in Camp Floyd mining district, the property of the Gold Belt mining campany. This property was in excellent shape last summer when work was discontinued in its development, and H. J. Dieter, the manager of the company, states that it is the injention to do some heavy development on the ground this winter.

Sam Newhouse, the well-known mining.

ground this winter.

Sam Newhouse, the well-known mining promoter, arrived in the city yesterday morning, and in the evening, accompanied by Thomas Wier, the mining engineer who has charge of the Henry M, group of mines at Bingham, he left for Norris, Mon., where Mr. Newhouse is interested in mining pro-triles. The two gentlemen will return to this city within a few days.

Everything is fair salling at the Bul-

city within a few days.

Everything is fair sailing at the Bullion-Beck mine at the present time red it is doubtful if it is generally understood that in this property there is an ore body that has been lately uncovered that in size promises to develop into the biggest chute of mineral that has yet been disclored in Eureka. This body of ore is on the 908-level and so fer as developed is all of 38 feet wide, and it carries values of 20 pg cent. lead and from 20 to 30 ounces in silver to the ton. The company is shipping 100 ions of ore from this new strike daily.

The New American Gas & Fuel com-

from this new strike duily.

The New American Gas & Fuel company reopened the famous old Tuscarcra well yesterday and last night it indicated a pressure of 30 pounds to the square inch. With this well in operation the company has more gas then it knows what to do with, and it is escaping in the sit, and last night the immediate vicinity of the well was all abinze with flambeaux made from the escaping gas. In connection with the reopening of this big spouter The Herald is informed that H. L. Driver has started to reopen the celebrated Beller well.

ELIAS MORRIS ONE OF THE HAPPY OWNERS.

Had Stood His Last Dollar on the Outcome of the Mine-Yesterday's Trading at the Stock Exchange-Latest From the Camps.

"I had staked my last dollar on the outcome of 'his mine," said Elias Morris to a Herald reporter yesterday, "and if the boys had not struck it just as they did, I would be a ruined

just been notified that a most important strike had been made in the Vanderbilt mine, at Hailey, ida, which is owned by a Sait Lake company of which Mr. Morris is a large stockholder and an officer.

There is hardly a mining man in this city but that is posted as to the difficulties that the company has had in the development of this property. In the first place the mine had been handled by previous owners in a slovenly manner and it took a large amount of work to get it into any

slovenly manner and it took a large amount of work to get it into any-thing like workmanlike shape, and when this had been accomplished and a mill erected at the mine, both the shaft house and the mill were de-stroyed by fire, which was believed to be incendiary. The disaster, coming as it did just as the company was about on its feet, took the tuck all out of it and it was some time before the of it and it was some time before the money could be raised for the purpose money could be raised for the purpose of carrying on the work, and to do this it was necessary for the officers to mortgage their homes and even their business; but they did this willingly, as they were confident that in time the mine would open up into one of the greatest producers in the west, and it is believed that this is now the case, as on Monday a telegram was received. as on Monday a telegram was received from L. T. Brockback, the asayer at the mine, that a fine body of on had been struck in the property and that the success of the enterprise was as-

In a letter that followed and which was received yesterday, the announcement was made that the new strike had been made in the lower tunnel to the west, in the face of which, at a vertical depth of 400 feet a fine body of high grade ore had been encountered. On the hanging wall of the vein the men cut through two and one-half inches of ruby silver and gray copper that assays 3,000 ounces in silver to the ton, and on the foot wall the face of the tunnel had been three feet into a solid body of steel galena ore and the foot wall has not yet been reached, and this ore, according to fire tests, shows values of 150 ounces silver and from 40 to 45, per cent, lead to the ton. The letter also stated that although the strike was only made on Saturday that already a two-carload lot had been taken out for shipment and that within a week from three to four carloads could be shipped every six or seven days.

In the windup of his letter Mr. Ernels In a letter that followed and which

sured.

As the outcome of the mid-summer As the outcome of the mid-summer carnival which was held in this city last summer, the governor has recently appointed a commission of ten, whose appointed a commission of ten, whose the last three below the level of the great duties will be a second or the summer than the second of the great duties will be a second or the mid-summer. The clearings of the associated banks last summer, the governor has recently appointed a commission of ten, whose duties will be to supervise a celebration to be held in this city next year in honor of the fiftieth anniversary of the settlement of Utah.

This commission will meet at the governor's office tomorrow for the purpose of receiving their credentials and also to organize, in order that work may begin at once in this praiseworthy undertaking, and it is believed that before long everything will be well in hand and that within a few weeks the enterprise will be in such shape that the commission will have no trouble in carrying the project to a successful

issue.

To start with, the commission has \$5,000 to dray on, as this amount was appropriated for this purpose by the legislature last winter; and it is confidently expected that every wide-awake citizen of the state will contribute something to the fund, and that all will unite in making this the greatest celebration ever held in Utah, or in the west, for that matter.

In mining circles in this city it has been suggested that the county

been suggested that the county courts of every county in the state be solicited to make an appropriation to this fund, to be used as a mineral and this fund, to be used as a mineral and agricultural display from the re-spective counties. This is an excellent idea and should be presented to the different county courts at an early

day.

The celebration of the fiftieth anniversary of Pioneer day will constitute one of the most important epochs in the history of the state, and every loyal citizen should join in the endeavor to make it a succe

THE MINING EXCHANGE.

Sales of Sunbeam and Steady Advance In South Swansen Stock.

While there was but little activity on the floor of the Mining Exchange yesterday, the market was very firm yesterday, the market was very firm and a number of advances were noted. As a general thing there was a healthy tone to the transactions of the call, and the upward tendency of As a general thing there was a that the opinion that State Line will be active the control of the previous of the market was very measured that the process of the precious of the front, as it seems as if this stock was booked for a purity that will land it to where it stood as the process of the previous day, while it seems to the process of the previous of the previous day, while it seems to the process of the previous day, while it seems to be found in the matter of making on every more than the other and the construct of the con

lieved that if the present pace is kept up that it will not be long before the stock will touch the \$1 mark again. South Swansea was one of the most active stocks on the board and closed strong at \$1.20 bid; while holders held out for \$1.35. On the streets after the call it was stated that the insiders were buying this stock, and this caused something of a flurry among mock investors. Northern Light was also in stiff demand, and although it falled to bring out a higher bid than 49 cents, it was quite active on the streets in the afternoon at 51 and 53 cents, and even this advance failed to draw out any of the stock. Sunbeam sold a block of stock at 17 cents, but the price was then pushed up to 27%, and this was the closing asking quotation.

The transactions of the day were as

The transactions of the day were as SALES OF STOCK. 500 Sunbeam at 17 cents. The closing quotations were as fol-

SHOWING IN THE COMSTOCK. The Face of the Drift Cutting Into

Strenks of Fine Copper Ore. M. Dusseldorf, the manager of the Pack City, came down to Salt Lake yesterday, and in his grip he brought yesterday, and in his grap he brought with him some samples of fine ore from this property, and he was also the bearer of the pleasing intelligence that the mine never looked in a more promising condition than at the present time, and that if indications were anything to go by, that it would not be long now before the Comsteck would be for the first as a results producer of he on the Not as a regular producer of the precious modals.

of the tunnel had been three feet into a soild body of steel galena ore and the foot wall has not yet been reached, and this ore, according to fire tests, shows values of 150 ounces silver and from 40 to 45, per cent, lead to the ton. The letter also stated that addition. The letter also stated that addition. The letter also stated that addition in the strike was only made on a Saturday that already a two-carload lot had been taken out for shipment and that within a week from three to four carloads could be shipped every six or seven days.

In the windup of his letter Mr. Brockback stated that the Vanderbilt was today the biggest silver mine in the state of Idaho, and for the sake of the Sail Lakers who are heavily interested in this property, it is to be hoped that this is true.

At a meeting of the directors of the company, held yesterday, it was deficied to install IRe Jennings as auroer-intendent of the mine, and he left last night for Halley accompanied by Secretary A. G. Glauque, Mr. Glauque, before returning home, will make a thorough examination of the mine and the new strike and report on the same. "I hope that we will soon be on easy street," said Mr. Morris after dilating on the extent of the new strike, "but the first thing that we will do now that we have struck it rich, will be ito pay everything that we owe, and this will not take us long; and then look out for dividends."

PIONEER ANNIVERSARY.

drain tunnel trust is 30 inches in wich and that carries values of 25 per cent. lead and 150 ounces in silver to the ton, and E is believed that this will turn out to be one of the most important discoveries that his been made in the

out to be one of the most superical discoveries that his been made in the mine for some time.

One of the most interesting features connected with the strike is the finding of slickensides; and a piece of this ore is now on exhibition at the Ontarlo office that is as smooth as glass, and to the uninitiated it has every appearance of having made the intimite acquaintance of an emery some. The finding of slickensides is always considered as a very good sign, as they are an indication of the permanency of the deposit and they are nearly always to be found in fissure veira and are the result of the grinding together of the ore and the banging on the forwall of the vein, which always results in the making of a surface that is as smooth as if polished by a lapidary.

The Ontarto mine, with over \$13,000.000 in dividends to its credic, is shill strikely in the swim and it is the colonstrately in the swim and it is the opinion of mining men this the grand old property is good for many millions ion of mining men this tire a

THE RIG SUNFLOWER.

A Property of Merit That Gives Good Promise For the Puture.

Colonel Andrew Corry, one of the Colonel Andrew Corry, one of the prominent citizens of Cedar City, in Iron county, who was in the city yesterday from Omaha, where he has been with a shipment of fat cattle, in the sale of which he met with a good market, informs The Herald that everything is all excitement in the southern country just now over the valuable discovery of rich gold and silver deposits in the State Line dis. ilver deposits in the State Line dis-

Herald has made frequent menthe Heraid has made requested in the tion of the encouraging showing in this new camp, and all that this paper has said concerning it is more than corroborated by Mr. Corry, who is of the opinion that State Line will eventually come to the front as one of the richest producers of the precious

with depth a solid body of this ore will be encountered. Being firmly im-pressed with this opinion the owners of this property have just let a contract for the sinking of a 100-foot shaft in its development, and it is the intention its development, and it is the intention to form a stock company within a short time so that the mine can be worked to better advantage. As the present head of the unorganized company, the colonel will be the president of the new organization as soon as it is incorporated, and he is fully satisfied that before the roses come again the property will be on a shipping basis.

Nearly all the mines of the camp,

Nearly all the mines of the camp, according to the colonel, are looking well, with fine bodies of ore exposed to view in their workings, and, in his opinion, all that is needed now to give an impetus to the growth of the district is the installation of a mill for the treatment of the ores of the camp, as the long distance from the milroad prohibitis the shipping of anything but the richest ores.

The colonel mentions particularly the Drake & Lambert mine as an illustration of the value of the camp. On this ground, he says, there is a tunnel that is in a distance of 155 feet, in the face of which there is a 14-fox body of ore that assays from \$25 to \$300 in gold to the ton, and it is all free milling; and as work progresses on this and the other mines of the district, the ore gones are growing larger, and at the present time there seems to be no doubt as to the permanency of the ore deposits.

Line City, which is the "hub" of the district, is growing rapidly and can now boast of about 20 houses, and it is believed that by spring the little town will have more than doubled in size. Colonel Corry and his two sons.

trict court of Jefferson county Judge M. Dusseldorf, the manager of the bond, which was fixed at \$25,000 by the Comstock mine, which is located et court, will be filed by Senator Martin

inquiry revealed the fact that Johnson had changed his mind and had refused to qualify. He had prepared his bond and had it signed up ready for filling when he was induced to change his course and refuse to proceed further. His bond was \$50,000, but in Martin's case it was reduced to \$25,000.

Ex-Chief Justice A. P. Horton represented the Santa Fe and was present at the proceedings, He refused to appear in the case except to call the court's attention to the fact that the Santa Fe had filed a petition and bond for the removal of the case to the federal court. The court took no judicial notice of this, as it does not recognize the jurisdiction of the federal court in the case, and declared that the petitions and motions and suits additional to these proceedings would have to be heard in the district court of Jefferson county.

Proposition For the Adoption of CHICAGO GENERAL MARKET.

Wheat Develops Strength In the Early Tradings.

Before Retiring

take Ayer's Pills, and you will sleep better and wake in better condition for the day's work. Ayer's Cathartic Pills have no equal as a pleasant and effectual remedy for constipation, biliousness, sick headache, and all liver troubles. They are sugar-coated, and so perfectly prepared, that they cure without the annoyances experienced in the use of so many of the pills on the market. Ask your druggist for Ayer's Cathartic Pills. When other pills won't help you, Ayer's is

THE PILL THAT WILL

disregard of the hog market. The open-ing was easy and the subsequent tone firm. Elevator Controversy.

Chicago, Nov. 18.-In the elevator controversy, which was resumed before Judge Tuley today, Attorney Henry Rob-47s bins, representing the board of trade in-11 terests, advanced a novel and startling proposition. The evidence which affirms the basis of his argument was presented today. It consists of tables compiled from the reports of the warenouse co and covering the period from 1872 to 1896.

The proposition which the attorney will urge is that the big elevator men of Chicago are responsible for the general depression of the wheat market. According to Attorney Robbins, these tables show that the Immense amount of grain kept constantly in store in Chicago elevators accounts for the depression of the market. The object of the elevator men in keeping this grain in stock is, Mr. Hobbins argues, to keep prices low, so as to reduce the amount of capital invested. The controversy between the warehousemen and the board of trade began a year and a half ago, when the board of trade sought to prevent the warehouse men from dealing in grain in the open market. It was claimed that the latter were violating their charter privileges, as they other people which was merely stored in mission decided against the elevator promission decided against the elevator promission decided against the elevator promission decided against the elevator proand covering the period from 1873 to 1866 mission decided against the elevator peo-ple, and the case was then taken into

Named as the Next Meeting Place.

Louisville, Nov. 18.—The National Fraternal congress elected officers to day. J. G. Johnson of Kansas, representing the United Order of Woodmen, was chosen president; J. E. Shepard of Lawrence, Mass. representing the United Order of Pillgrim Fathers, vice-president, and W. W. Sackett of Pennsylvania was re-elected secretary-treasurer.

Port Huron, Mich., was selected as the meeting place for next year's congress. Chicago and Kansas Chicago and Ch

put in nomination for 1898. A commit-tee was appointed by retiring President Spooner to confer with the Knights and Ladies of Honor and adjust the differences between that order and
